Socratic Seminar ?'s:

BIG QUESTION: Should scientists be able to clone? Should they bring back the Woolly Mammoth? (don't answer yet!) :)

1. How do they do it? What's the process of cloning?

2. What's the success rate? How effective is it?

3. Are they really identical?

4. Can we clone humans? Should we clone humans?

5. Is cloning right/ethical? Why or why not?
